## CYCLE MUDGEE REGION

This booklet has been produced in response to the increasing number of cyclists visiting the Mudgee region who enquire about "good places to ride".

It also aims to encourage residents to explore and enjoy their local area by bicycle.

A group of local, experienced cyclists have selected 20 rides, with a good cross-section of grade and distance, one or more of which will suit the ability of most cyclists.

In compiling the many routes for this booklet, an attempt was made to avoid busy roads where possible, so that cyclists could experience the many quieter, pleasant country back roads in this region.

Lastly, there are a number of wonderful venues worth visiting along some of these rides - wineries, cafes, galleries - so please check with the Visitor Information Centre for their opening times.

## CYCLING SAFETY TIPS

Although many of the routes chosen here involve quiet secondary roads, please keep in mind that the speed limit on these roads is usually the same as the main roads, unless otherwise signified.

- Cycle in single file on busy roads, and particularly adjacent to unbroken double lines and any winding road with poor visibility.
- Riding two abreast is allowed on quieter stretches.
- Give hand signals when turning, changing lanes or stopping.
- At intersections – even if you have right of way – catch the driver's eye whenever possible.
- If you need to have a drink, check a map or answer your phone, stop and get off your bike first.
- When stopping for a break, choose a safe spot and move well away from the road.
- Be careful on gravel surfaces, by not braking or turning suddenly.
- Wear bright clothing to make you more visible.
- Make sure you take plenty of water with you.
- Adults must not cycle on footpaths unless in the company of a child under the age of 12 years.
- Children under age 10 should not ride on the road.
