### Hints, Tips & Protocols

Upon receiving your ezy-ride e-bike, please read these 'Hints, Tips & Protocols' before you commence exploring our beautiful region.

- 1) **Wear a bright coloured top, put your riding helmet on,**  
and ensure the e-bike is in 1<sup>st</sup> gear
- 2) Turn on front and rear lights

Press & release  
4x for  
strobe light

Press & hold tiny button  
at the top for 3-4sec,  
press once more for  
strobe light  
(end of carry rack)

- 3) Go for a short ride, riding your e-bike like a p-bike
- 4) While pedaling click through all the gears up and down

### Right Bar Grip

**Front brake lever**

**Indicator gear position**

**Harder to Pedal**  
Pull towards you one click at a time

**Easier to Pedal**  
Push away from you one click at a time

- 5) We suggest using Front & Rear brakes at the same time when braking
- 6) Now stop the bike, and push and release the 'M' button to energise the system, remember **nothing will happen until you begin pedaling**

### Left Bar Grip

**Rear brake lever**

**M = On - Push and release**  
**Off - Push and hold 3sec**

**+ = power assist increase**

**- = power assist decrease**

**Screen**  
 Battery Level  
 Speedometer  
 Distance  
 Power Assist Level

7) Ensure the power e-assist indicator displays '1'

8) Begin to pedal and after 3-5sec the e-assist will engage

9) The e-assist will only engage while you are pedaling

10) Change up gears until your pedal speed matches the e-assist speed

11) Generally, the more e-assist, the higher the gear required

12) Stay as far to the left of your side of the road as possible

13) Always e-ride single file

14) Signal which way you are turning

15) Use the horn/bell for going past pedestrians, other bikes and motor vehicles

16) Alcohol consumption rules apply to e-bikes,

so do not e-ride while over the PCA limit

17) To disengage e-assist, stop pedaling and apply the brakes

18) We recommend front and rear brakes be applied at the same time

19) Especially not just the front brake (right bar grip) by itself

20) When leaving the e-bike, turn off by holding the 'M' button for 3-4sec (see pg.1)

turn off front and rear lights

Press & release

Press & hold tiny button at the top for 3sec

21) Always lock the e-bike in a shady area away from direct sunlight if leaving it to go into a shop/winery etc, it is best to secure your e-bike to an immovable object such as a post **A)**, if this is not available secure the wheel to the frame **B)**

**A)**

Best

recommended

**B)**

Ok

If no option

22) Keep your key & helmet with you at all times when away from the e-bike

23) Place your key in the Mb phone case and close when riding your e-bike

Please have a great day and thank you hiring from 'Ezyride Mudgee' and for ezy...ing the strain on the environment.
